

# Preston Well Completion Report Screen and Data Sampler

## The Preston Well Completion Report Screen/Information Sampler

The Preston Well Completion Report is a monthly report that includes OCTG consumption by size, weight and grade at the region, state and county level for about 97% of all rigs active in the U.S. This Report Screen and Data Sampler is designed to provide a look at the type and structure of data received each month in the Report. The sample data on the following pages is for the Gulf Coast Region. Other regions include Alaska, Central States, Appalachian and the Rockies.

The Report shown below is a summary of well count by state for the current month and year to date. Year to date for new subscriptions will be from the date your subscription is active. 'Catch-up' data can be purchased along with your subscription.

MAY 2014 SUMMARY												
NEW WELLS COMPLETED												
State	0 - 4,999		5,000 - 9,999		10,000 - 14,999		15,000 - 19,999		20,000 and Over		GRAND TOTAL

# Preston Well Completion Report Screen and Data Sampler

Each region has a series of reports that are provided to you in Excel. This gives you the ability to create additional reports beyond the standard reports that are included to do your own analysis. See the tab names in the pictures on the following pages. This report is the API report which identifies the string design on a well by well basis for the month of the completion report.
